## Versions History

Date	Screwdriver/ Drill	User Guide	Reference Manual	Markups List
2020-08-26	3.2.12 (start)	3.2.0	3.2.0	3.2.0
2020-09-11	3.3.0	3.3.0	3.2.0	3.2.0
2020-09-30	3.4.0	3.4.0	3.2.0	3.2.0
2020-10-14	3.5.6	3.5.1	3.3.1	3.3.1

### New enhancements and debug in version 3.5.6

0. Replacement of PDF files with as many HTML, linking to a PDF on line.
1. Deletion of `appli` markup, simplification of properties file, the application name coincides with the name of ELE file and properties file.
2. automatic setting of the label language in 4 CRUD buttons.
3. automatic setting of language code in `<html lang="xx">`
4. new markups `formr` and `fstart` to implement a radio button control in a JSP
5. rename of markup `firmed` in `company`; rename of web-flow markups `fparams` and `fv` in `wparams` and `wv`
6. new markup `appse`, name and version of the application server or servlet container

### New enhancements and debug in version 3.4.0

0. at the time of installation the current version of the JRE is checked;
1. the installation Drill plug-in is now Maven, so it was possible to set UTF-8;
2. some empty directories have been added to Screwdriver that previously, due to a bug, did not emerge;
3. some simple statistics are produced at the end of the Screwdriver execution, file is `logs/statistics.log`.
4. refactoring of class `it.ramecera.drill.ui.handlers.SpindleHandler`
5. new item in the drop-down menu "Screwdriver": the first time I produce a new web app, clicking "Bring out the last generated application" I bring up the application in Eclipse's "Package Explorer" view.
6. extension to Eclipse version 2020-09

## **New enhancements and debug in version 3.3.0**

0. added a file makeJar.jar to build the JAR of waxds-copper JPA project;
1. new rational management of the deletion of internal files in the generated web app;
2. check-box "Remember" to avoid too much questions when I replace the modified classes;
3. implementation of DailyRollingFileAppender in Screwdriver log4j.properties file;
4. edit an error message in class SpindleHandler in Drill plug-in.
